This can be found by taking a value from it  $(N+1)/2$  -th term  $e$  where  $n$  is the number of observations and  $\sigma$  is the standard deviation. The formula for the  $n$ -th term of an arithmetic progression is  $a_n = a_1 + (n-1)d$ , where  $a_1$  is the first term and  $d$  is the common difference. The sum of the first  $n$  terms of an arithmetic progression is  $S_n = \frac{n}{2}(2a_1 + (n-1)d)$ . The sum of the first  $n$  terms of a geometric progression is  $S_n = a_1 \frac{1-r^{n+1}}{1-r}$ , where  $r$  is the common ratio.

The upcoming release of Call of Duty: Modern Warfare III is quickly approaching its November 10 PC launch date on Battle.net and Steam. Call of Duty: Modern Warfare III PC Trailer, Specs, Preloading Info, and ...
