&lt;p&gt;After learning of the Key&#39;s location, Richtofen travels to Dimension 63 and arrives in Morg City in&#129297; 1934, where the Apothicons, former Keepers who were corrupted and mutated by the dark energy of the Aether, manipulated four&#129297; individuals: Jessica Rose, a burlesque dancer; Jack Vincent, a corrupt cop; Floyd Campbell, an up-and-coming boxer; and Nero Blackstone, a&#129297; washed-up magician. Misled into doing the bidding of the head Apothicon named the Shadowman, the four opened a rift beneath&#129297; the city using the Summoning Key, thereby freeing an ancient Apothicon beast. With the Keepers&#39; aid, the four manage to&#129297; trap the Shadowman inside the Key, and banish the beast from their dimension. Before they could retrieve the Summoning Key&#129297; from the Keepers, however, Richtofen snags the Key from them, thanks them for their effort and exits through a portal,&#129297; leaving the four and the rest of Dimension 63 to be doomed by the Apothicons.&lt;/p&gt;

&lt;p&gt;Music [ edit ]&lt;/p&gt;

&lt;p&gt;The PS3 and&#129297; Xbox 360 versions received less praise than the other versions. IGN&#39;s Brian Albert criticised the lack of the campaign in&#129297; these versions, as well as the poor graphics and long waiting times, but concluded that despite these versions issues, they&#129297; were still very fun to play.[63]&lt;/p&gt;
