<p>Game Type HTML5</p>

<p>Controlling the swift and quick-witted Jay, you have to save your friends, which were taken captive by the menacing sky pirates. Their leader, Djinn Nadakhan, has a spine-chilling plan: he wants to destroy the Ninjago world and use the lego parts to rebuild his kingdom! You need to defeat him and his terrifying Djin Blade by finding the rare Tiger Widow venom to save your friends and the entire Lego universe!</p>

<p>The game consists of 12 platform levels of increasing difficulty. You navigate the levels using a simple one-touch/click control mechanism. All you need to do to move is click on your desired location. The same goes for attacking enemies, hiding behind objects, or climbing. Jumping is just as easy: click and drag to adjust the angle and landing point.</p>

<p>As you complete each level, you should make a point to collect all the stars and earn as many studs as you can. You can use the accumulated studs at the end of each level to purchase ninja weapons or upgrade your existing ones. The items can grant you new skills, such as climbing, in the case of the ninja hook, or melee attack, for the throwing star. Access the Shop by clicking on the button on the right side of the main menu.</p>

p>

<p>One approach would be simply clicking on them and defeat them directly, using a powerful weapon. Going for the straightforward approach is usually a faster way of leveling up, but keep in mind that you will need items to upgrade your health and attack power. You can check on your health status by glancing at the red hearts on the right side of the screen.</p>
