

c darwin2 poker

All I need to run a game from sources is to download Defold IDE and build/run a project.

Defold has the CLI tool bob.jar that we use for CI to make debug builds for internal use, and release builds for the publisher.

In-game physics is tuned up to run with a fixed timestep on 16.67ms (60) Tj T* BT

et display.vsync = on, display.update_frequency = 60, and it turned out to be an issue because the game runs in slow-mo mode if a player has really slow hardware. @aglitchman did a temporary workaround for this. To sum up, it will be awesome if a developer can write his own gameloop script to control update/physics/render steps. @aglitchman will write his thoughts soon, I think.
