In the Amarok, the 4Motion system is a unique all-wheel-drive system that provides better traction and control, enhancing the driving experience. It ensures that power is distributed evenly between the wheels, minimizing the risk of wheel slippage and providing better handling, particularly in slippery conditions. The Volkswagen Amarok is equipped with a 4Motion permanent AWD, which is ideal for off-roading, ensuring that the Amarok can handle tough terrains with ease.

How does 4Motion compare to traditional four-wheel-drive systems?

Traditional four-wheel systems offer traction control through engagement, only locking in when the driver selects the mode. However, the 4Motion system is engaged continuously, eliminating the need for driver intervention. By providing permanent all-wheel-drive power distribution, the system improves safety, stability, and handling, making it ideal for towing trailers, off-roading, and driving on slippery surfaces.
