In the most large open-pit mines, Bingham's walls are terraced to reduce landslide risk and enable heavy equipment to reach mineral-bearing rock. Vertical faces are called "horizontal surfaces are "benches." Ten big holes: the World's largest open-pit mine produces 10 million metric tons per annum.

defined by Mineral Resources and the Department of Energy and Environmental Affairs. The mine is connected to the world's largest open-pit mine by a 7.5 km long road, which is used to transport the ore to the processing plant.
