<p>Spin Pesa-Spin & Win</p>
<p></p><p>To fully exploit the constrained width, avoid loading the neighbouring structures and straddle shared utilities running under the site, the <129776> house was constructed using a lightweight steel frame on a piled slab. The steelwork was prefabricated as a series of <129776> portal frames that were craned down the alley and site-welded together. Given that every inch in such a narrow space <129776> was valuable we chose to fully weld the connections and express the frame internally, even utilising the depth of the <129776> steels to maximise the space.</p>
<p>Alongside the painted steel a simple palette of spruce plywood, douglas fir joists, terrazzo and cork <129776> flooring enriches the interior. Externally the timber framed walls are clad in handmade pewter glazed brick slips with a patina <129776> that reflects the changing light of the sky. Both the simply landscaped and planted rear courtyard and the garden in <129776> front of the house enhance the feeling of space in this small dwelling.</p>
<p>This self-build project had a long gestation, fitted <129776> in around professional and family life. The design and construction were developed as time and money allowed so whilst planning <129776> consent was given in January 2014 and the ground works commenced in the spring of 2024, the building was not <129776> completed until August 2024. We worked closely with friend and joiner Michael Tye to lead a small team of local <129776> subcontractors and employed specialist fabricators for certain key packages as well as undertaking a fair amount of the work ourselves.</p>
<p>The <129776> result is a unique and highly crafted home that is a tes
