three dots that are represented in the upper-right of the device screen. 3. Click on the home icon in the top navigation bar. This will navigate you to the home screen.

That's the end of this article. In this part of the course, we'll look at how to find out why a 404 error occurred. A 404 error is a common HTTP error that indicates that the requested resource could not be found. This can happen for a variety of reasons, such as a broken link, a typo in the URL, or a problem with the server. In this article, we'll look at five ways to solve a 404 error. 1. Check the URL: Make sure you've entered the correct URL. 2. Check the file name: Make sure the file name is correct. 3. Check the file location: Make sure the file is in the correct location. 4. Check the file permissions: Make sure the file has the correct permissions. 5. Contact the server administrator: If you're still having trouble, contact the server administrator.

Five ways to solve a 404 error: 1. Check the URL: Make sure you've entered the correct URL. 2. Check the file name: Make sure the file name is correct. 3. Check the file location: Make sure the file is in the correct location. 4. Check the file permissions: Make sure the file has the correct permissions. 5.
