[Operating system \(OS\)](#) is the program that, after being initially loaded into the computer by a boot program, manages all of the other application programs in a computer. The application programs make use of the operating system by making requests for services through a defined application program interface (API).

What is an Operating System (OS)? Definition, Types and Examples

What is an Operating System (OS)? Definition, Types and Examples

By composite Particles such as hadrons, atomic nuclei (and Atoms).

Spin (physics) - Wikipedia: Spin is the total linear momentum of a particle or system of particles. Spin is an intrinsic property of particles and is not to be confused with the orbital angular momentum of a system of particles.
