The term "2 UI" is widely used or recognized in the design of user interfaces (UI). However, we presume that you want to know about "dual interface" or "double layout" of the user interface.
Two user interfaces (2 UI) generally refer to the practice of providing two different sets of layout interfaces for the same set of functionalities, so that users can choose the one that best suits their preferences or needs. This can be either a situation where the two different sets of interfaces are familiar to the user or, on the other hand, the simplified interface is ideal for novice users, providing a limited set of options and functionalities, making it easier to navigate and understand. On the other hand, the advanced interface can be designed for users
